

Drug & Alcohol Compliance

As required by DOT/PHMSA, energy & utilities companies must ensure that individuals – whether employees or contractors – who perform covered functions on their pipeline undergo drug and alcohol testing. Veriforce provides a comprehensive solution for drug and alcohol (D&A) compliance that brings together software with value-added audit and training services to help energy & utilities companies streamline management of their contractor D&A program in compliance with DOT/PHMSA requirements and drive improvements that mitigate contractor risk and enhance safety. Our ability to provide a D&A compliance solution is particularly beneficial for clients that use our OQ compliance solution and want the convenience of managing both DOT-related contractor compliance programs through a single system and vendor.

VeriSource D&A Compliance Management

Streamline management of your contractor D&A compliance program and get visibility into contractors' compliance with DOT/PHMSA requirements

- Clients use VeriSource™ to get an at-a-glance view of the status of each contractor's D&A program compliance, as well as quick access to contractors' D&A statistical data and program details
- As a value-added service included with our software, Veriforce gathers and reviews each contractor's D&A plan(s), MRO (Medical Review Officer) and SAP (Substance Abuse Professional) contacts, and covered employee list, as well as collects contractors' D&A statistical data and monitors submission of updates

D&A Training

Gain access to training needed to ensure defensible DOT/PHMSA D&A compliance programs

- Reasonable Suspicion Supervisor Computer-Based Training Library – Two free courses that teach supervisors how to recognize individuals under the influence of drugs and/or alcohol as required by DOT/PHMSA; courses accessible, and results tracked, through VeriSource

Contractor D&A Audits

Get visibility into the quality of your contractors' D&A programs and help them drive improvements that mitigate your risk and enhance safety

- Veriforce experts audit a group of contractors that is selected by the client
- Audits include a review of D&A-related records and testing results, EAP training and communications, and subcontractor D&A compliance management activities
- Audit summary reports, accessed via VeriSource, are available to the client and the contractor
- The Veriforce team is available to provide contractors with guidance when taking corrective action to resolve any audit findings
