

Certificate of Insurance Tracking

By ensuring that contractors, suppliers, and other vendors maintain appropriate insurance coverage, supply chain and procurement professionals play a critical role in mitigating third-party and supply chain risk. VeriSource™ Certificate of Insurance Tracking enables them to easily and efficiently manage insurance prequalification for vendors of all sizes, verify which vendors meet insurance requirements, and keep on top of vendors' policy expirations.

Streamlined
prequalification
program
administration

Easy, reliable
identification
of compliant
vendors

One solution to
manage vendors
of all sizes, saving
time and money

Improved
effectiveness of
key third-party risk
management program

Flexible, Intuitive Technology to Streamline Prequalification

VeriSource Certificate of Insurance Tracking provides:

- An at-a-glance view of vendor status to verify which vendors meet your company's insurance requirements, plus centralized, web-based access to all of your vendors' coverage details and certificates of insurance (COIs)
- COI Tracking Actions and Action Badges that highlight any incomplete tasks, which streamlines your program management, and, in the vendor's view, ensures they know exactly what must be completed to get or stay compliant
- KPI (Key Performance Indicator) charts that allow you to efficiently monitor your program and keep on top of vendors' policy expirations, as well as automated emails that alert vendors to upcoming expirations
- Flexible client-side configuration, enabling you to group vendors and tailor their insurance requirements based on your company's procurement policies and risk requirements
- An integrated Safety Compliance Management option, giving your organization a one-stop view of vendor status across both insurance and safety prequalification requirements
- The ability to securely share key vendor data – such as current insurance status – by integrating with procurement, ERP, risk management, or other enterprise systems, enabling a more complete view of vendor relationships and risk without having to access multiple systems

A Solution to Manage Vendors of All Sizes, Backed by Audit Services

- Unlike some solutions, a VeriSource subscription is affordable for even your smallest contractors, suppliers, and other vendors so you can leverage smaller, local vendors that deliver the best value for your company without the potential hassle of having to manage them outside of the software
- VeriForce® auditors review all submitted coverage details against a vendor's COI to ensure your requirements are met
